

PRICE LIST.

GEOLOGY, ARCHÆOLOGY, PROSPECTING, MINING, QUARRYING, STONEMWORKING, & LAPIDARY WORK.

Effective February, 2008.

☛ NOTE.-In the present volatile market, it is wise always to confirm prices by telephone before ordering. Prices and products subject to change without notice. Availability of items is not always certain. Most items require to be made to order, and there may be delays in production and thus delivery; this may require three or more months.

QUARRYING, MINING, AND EXCAVATING TOOLS. (ALSO APPLICABLE TO ARCHÆOLOGY.)

GENERAL TOOLS.

VEHICULAR GENERAL SERVICE AND SURVIVAL SHOVEL. For the Most Demanding Use. Best Heavy-Gauge Steel. Treaded. 8" x 10-1/2" Blade with Long Socket. 24" Hand-Waxed Ashen T-Handle for Ease of Twisting in Tight Situations. Designed Especially for Use with the Land Rover, Standard Issue on All Vehicles in the British Army. Very Popular with Off-Roaders, Reenactors, Adventurers, and Explorers throughout the World. A Spare Handle is Recommended.

Loose. England. Richard Carter, Ltd. CGENSSAT24 \$60

SPARE HANDLE FOR VEHICULAR GENERAL SERVICE AND SURVIVAL SHOVEL, N° CGANSSAT24. Sturdy Hand-Waxed Ashen T-Handle for Ease in Twisting in Tight Situations. Light. Unlike Hickory, Which Amplifies, Ash Absorbs Shock. Ash Will Break Sooner, but Your Elbow Will Not.

Loose. England. Richard Carter, Ltd. CGENSSAT24HA \$36

SAFETY TOOLS.

PLEASE SEE the Safety Department for items useful in mining and quarrying safety.

HANDLING TOOLS.

MESSRS. HALE & CO. are pleased to announce that they have recently been authorised to sell the best mining chain and cable made in the world, that of Messrs. Parsons, of England. In addition to these, entirely made in England, and used in the coal mines of Great Britain and the United States, as well as the gold mines of the Witwatersrand in South Africa, Messrs. Parsons own Acco Chain, of Pennsylvania, the best makers of specialist chains in the United States, whose chain is entirely made in the United States. Messrs. Hale & Co. work with the mining engineers and specialists of Messrs. Parsons and Acco, and thus are capable of providing complete establishments for the handling of materials at any kind of mine, from the smallest to the largest. Parsons and Acco chain, winches, and sprockets are also eminently useful in oil fields, stone and other quarries, and the surface, well, and deep mining of salts, gypsum, sulphur, &c., and, indeed, the full spectrum of industries whose activity is the extraction and processing of natural resources. Whether you are a lone prospector testing a claim, or the chairman of the largest mine in the world, Parsons and Acco chain, cable, and hoisting machinery is the highest-quality and safest make, and no order is too small or too large.
